

March 6, 2019

MTS Freight will revise its general rates, by 5.99%, effective April 1, 2019. The general increase does not apply to contract pricing or transportation agreements with a specific expiration date.

The rate increase is being implemented to help offset the rising costs of doing business; including Federal regulatory compliance, higher equipment costs and wage pressure associated with the nationwide driver shortage.

If you have questions regarding our service or this rate increase, please contact your local account representative.
